

TIDIMATSO DANIEL MALATJI

Cape Town, Western Cape, South Africa — +27 75 439 0033 — tidimatso.malatji01@gmail.com

Portfolio: portfolio-t1dt.vercel.app — GitHub: github.com/tidimatsomalatji341-boop — LinkedIn: surl.li/wkuouk

CAREER OBJECTIVE

Driven and analytical Mathematics and Statistics student with a strong foundation in probability, statistical reasoning, and quantitative problem-solving. Seeking to combine data modeling and software tools with growing project coordination skills to build helpful, data-driven solutions in a professional technical environment.

EDUCATION

University of the Western Cape (UWC)

Expected Graduation: 2028

Bachelor of Science (BSc) in Mathematical and Statistical Science

- **Core Focus:** Advanced Calculus, Linear Algebra, Abstract Algebra, Probability Theory, Statistical Inference, Mathematical Modelling, and Programming Fundamentals.

TECHNICAL PROJECTS & EXPERIENCE

GreenGuard – Agri-Tech IoT Monitoring Ecosystem

May 2026

Core Infrastructure Partner (Collaboration Build – 2nd Place)

- Co-engineered a real-time IoT agricultural monitoring system streaming soil, gas, flame, motion, and temperature data from ESP32 devices via MQTT.
- Designed local data logging systems and created a 3-reading check system to stop false alarms caused by solar noise.
- Integrated automated firmware deployment protocols over BLE and WebREPL to keep devices working correctly across the network.

FUTURE DS 01 – Commercial Analytics Pipeline

April 2026

Lead Developer (Solo Build)

- Programmed an end-to-end data analysis pipeline using Python (Pandas, Seaborn, Matplotlib) to validate business datasets.
- Created custom data tables to map geographic and inventory variables, locating unprofitable product lines.
- Built regression models and charts to show the mathematical impact of discount strategies on profit margins.

ACHIEVEMENTS

MasterCard Foundation Scholarship

Scholarship Recipient

- Selected based on academic excellence, leadership potential, and commitment to regional technical development.
- Participate actively in program leadership workshops focused on community growth and responsible project management.

CORE & TECHNICAL SKILLS

Hard / Engineering Skills: Python, R, Java, Git, GitHub, VS Code, SAS, Microsoft Excel, Microsoft Access, Pandas, Seaborn, Statistical Modeling

Soft & Leadership Skills: Project Coordination, Quantitative Problem Solving, Analytical Thinking, Team Collaboration

CO-CURRICULAR ACTIVITIES

Kutlwanong ProMaths Program

Alumni Member

- Utilize the regional alumni infrastructure to manage academic workloads, maneuver through complex university modules, and maintain overall balanced development.
- Leverage peer networks for structural support, academic guidance, and settling effectively into high-workload STEM environments.
- Part of a collaborative network dedicated to foundational advancement in mathematics, science, and technology.

UWC Data Science & Technology Society

Active Member

- Collaborate on local software builds and actively participate in technical peer code reviews to optimize code efficiency.

INTERESTS & HOBBIES

Strategic Gaming: Play simulation games to practice fast decision-making. – **Physical Fitness:** Routine strength training for personal discipline.

Analytical Media: Watch investigative documentaries to study systems. – **Personal Reflection:** Time with friends for balance.

REFEREES

- **Mrs. Lorraine Gumede** (Program Referee) – Transitions Coordinator, MasterCard Foundation Scholars Program, UWC – lfgumede@uwc.ac.za – +27 72 225 1774
- **Mr. Tangai Defe** (Academic & Character Referee) – High School Mathematics Dept. – defetanga69@gmail.com – +27 73 835 8735
